

Project Summary

South West Loddon Water Supply Project

CLIENT	GMMWater
LOCATION	South West Loddon, VIC
PROJECT VALUE	Approx \$100K

Project Description

Consultancy to prepare preliminary design for the South West Loddon Project. The works involved Investigation into the feasibility of providing a piped domestic and stock supply to the South West area of the Loddon Shire (centred around Wedderburn) as an extension to the GMMWater rural pipeline network that serviced an area of over 200,000 Ha

Facets of work completed include:

- Development of concept options
- Pipeline hydraulics and modelling involving 13 pump stations and 1200 Km of pipeline
- Liaison with 3 water authorities and the Loddon Shire council.
- Preparation of cost estimates
- Further development of the preferred option prior to tender.
